Urraca

Aves

Pájaro que tiene cerca de medio metro de largo y unos seis decímetros de envergadura, con pico y pies negruzcos, y plumaje blanco en el vientre y arranque de las alas, y negro con reflejos metálicos en el resto del cuerpo. Abunda en España, se domestica con facilidad, es vocinglero, remeda palabras y trozos cortos de música, y suele llevarse al nido objetos pequeños, sobre todo si son brillantes.

Excusado

Artículos de baño

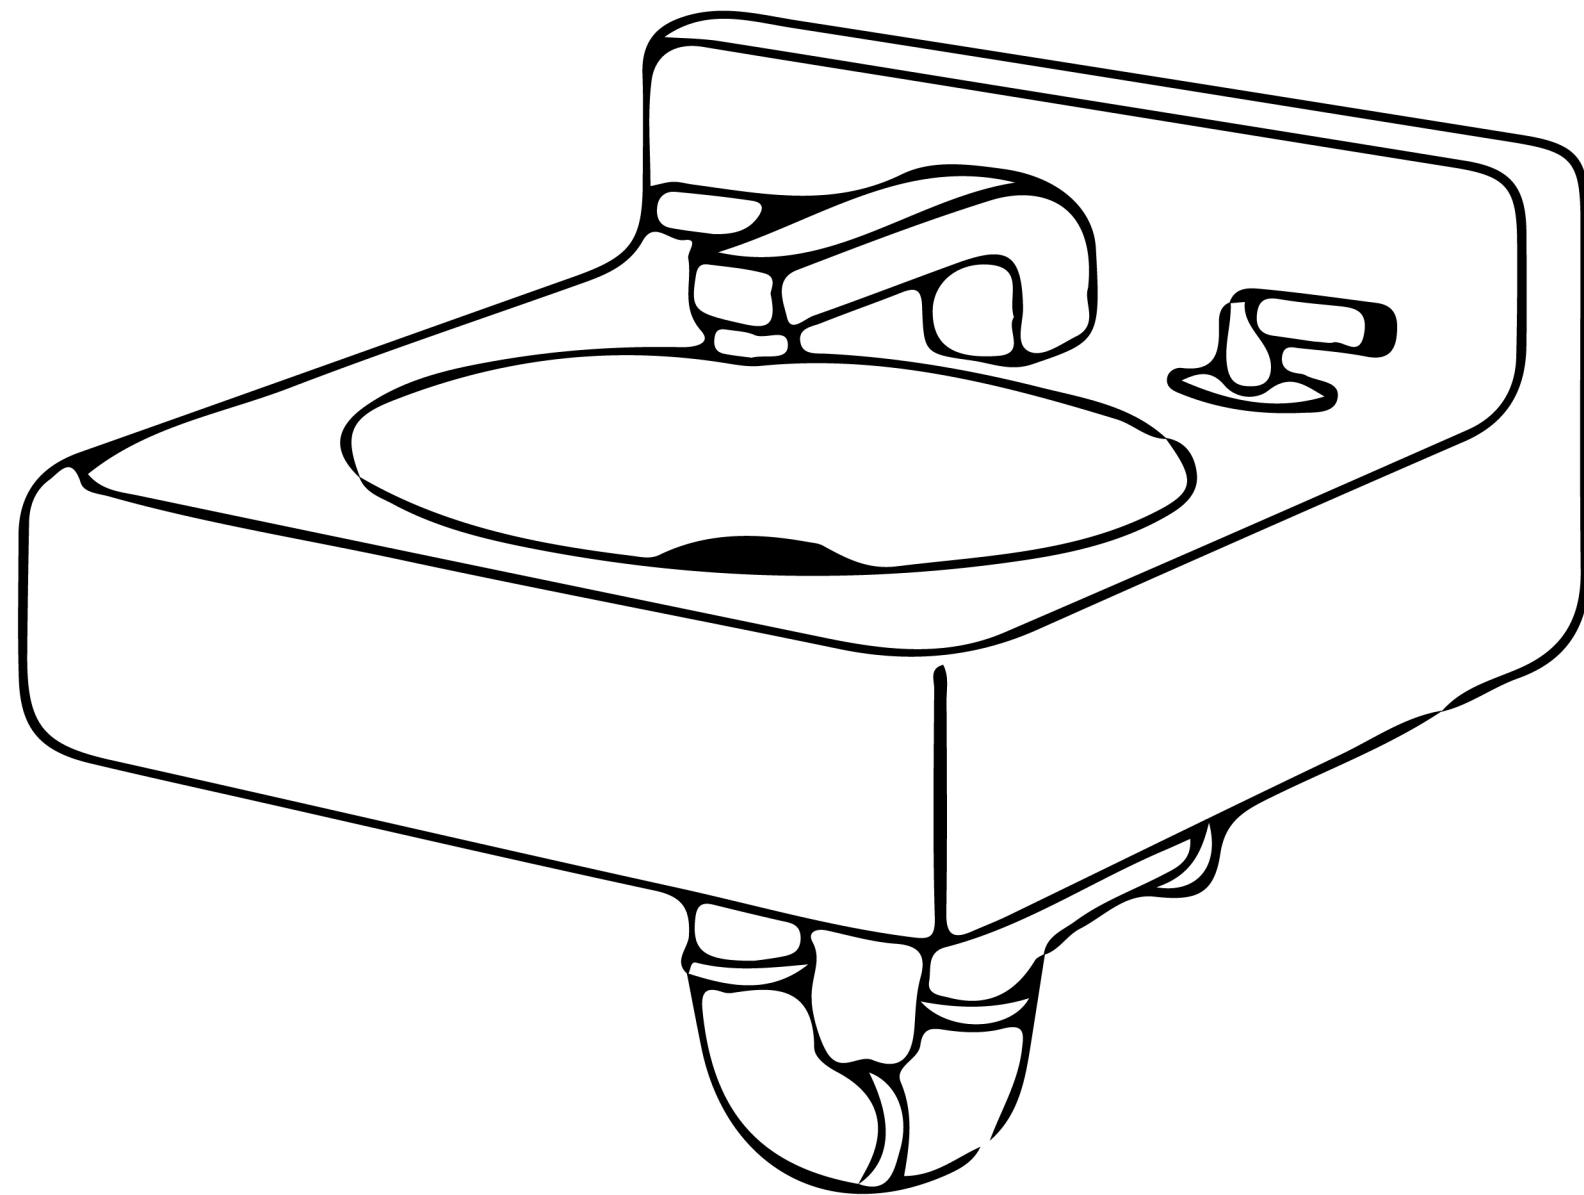

Se denomina retrete, inodoro o escusado al elemento sanitario utilizado para recoger y evacuar los excrementos y la orina humanos hacia la instalación de saneamiento y que (mediante un cierre de sifón de agua limpia) impide la salida de los olores de la cloaca hacia los espacios habitados.

Generalmente los inodoros se fabrican de porcelana, pero también de porcelana blanca y de acero inoxidable

Wapití

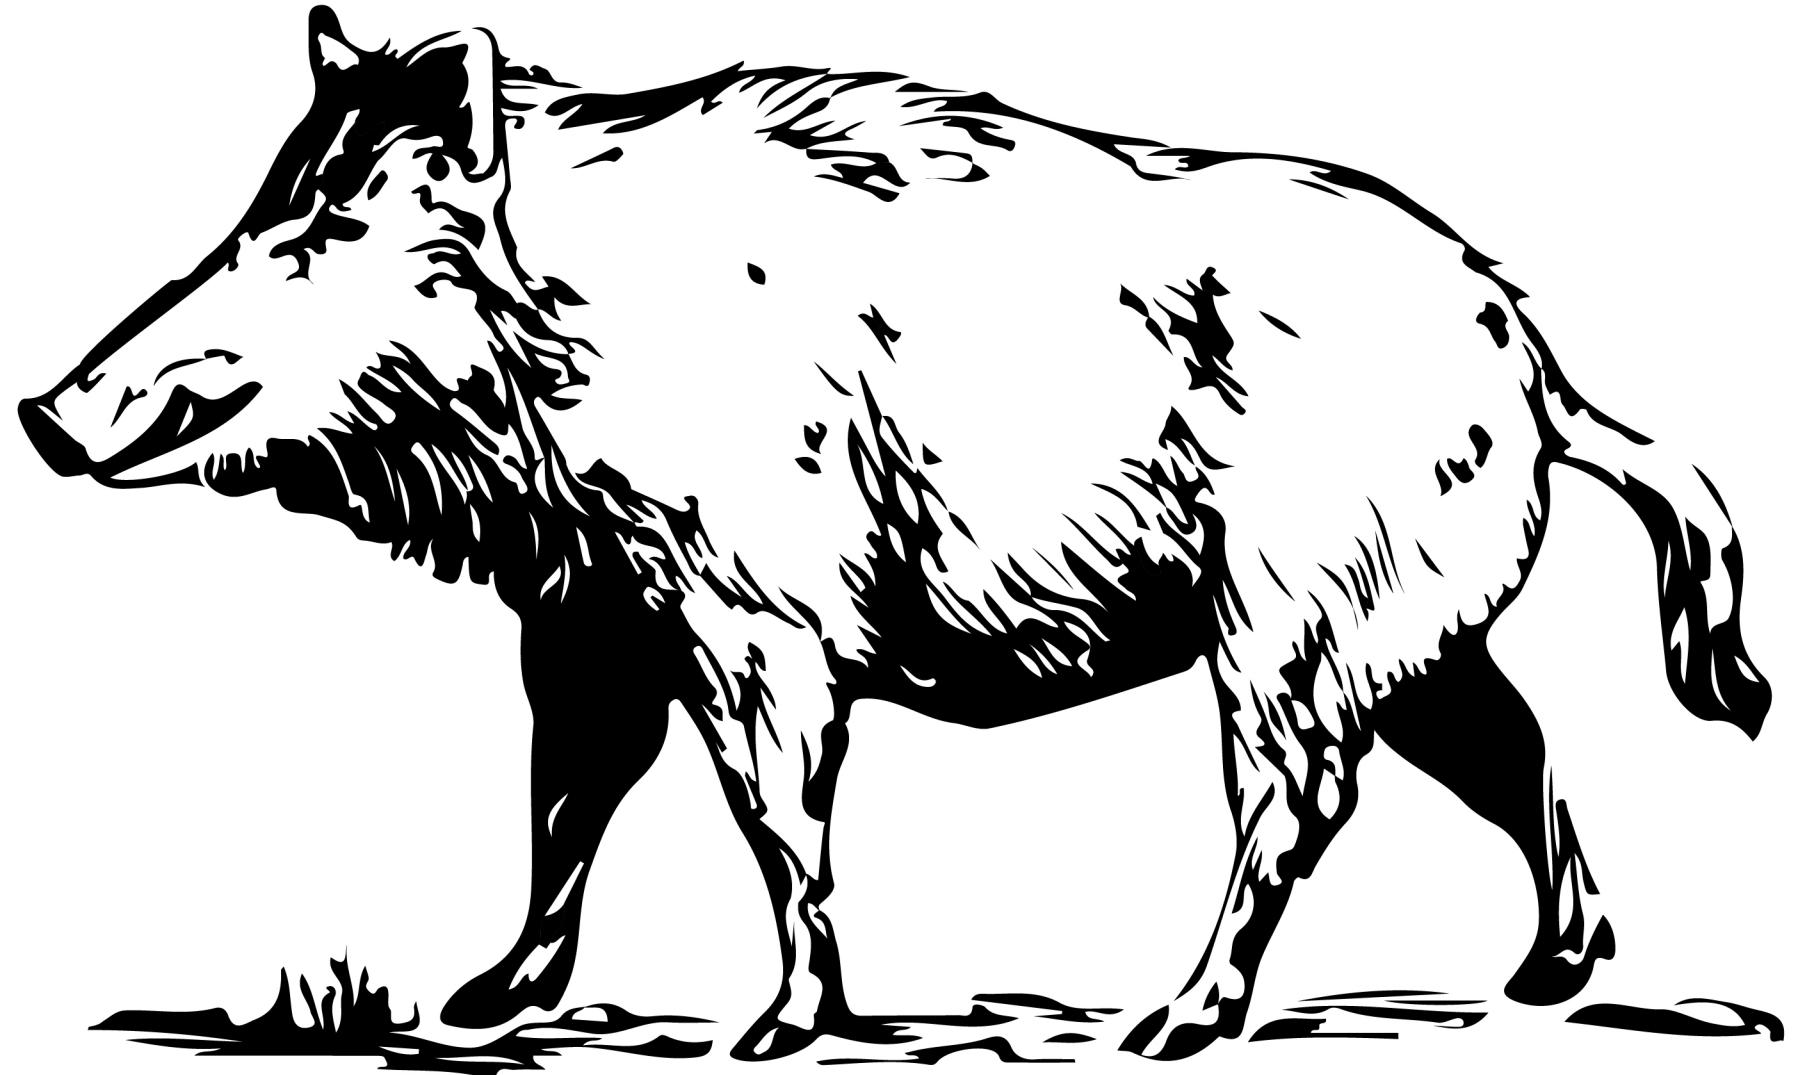

Animales cuadrúpedos

Una de las especies más grandes y su estatura es única entre todas las demás. Los machos destacan por su aspecto majestuoso, es muy fácil sentirse impresionado al ver uno de estos venados. Tienen pelo en el área de la barbilla y dependiendo de la ubicación en la que viven, este pelo puede ser muy largo. El cuerpo es generalmente de un tono marrón muy brillante, aunque en ocasiones puede tener colores más oscuros incluyendo el gris.
